RIFLESCOPES

ACCURACY

The Sightmark Triple Duty riflescopes use cutting edge glass, increasing clarity and precision accuracy, making them one of the best riflescopes on the market. The fully multi-coated optics transmits a bright and crisp picture that makes tracking and shooting targets quick and easy and a glass etched reticle makes for precision, clear shots. The scopes feature one-piece 30mm and 35mm tubes that increase light transmission and widen the field of view. O-ring sealed and nitrogen purged, the scopes are both water and fog proof.

These precision scopes feature oversized, locking windage and elevation turrets with 1/8" 1/4" and 1/2" MOA clicks, making difficult long range shots more accurate. Starter rings are included with every rifle scope. The scopes also features illuminated reticles to assist shooters in low light situations, making the Triple Duty series of riflescopes complimentary to any shooter's arsenal.

TRIPLE DUTY

Riflescope Reticles:

The Sightmark Circle Dot Duplex Reticle, Duplex Reticle, Mil-Dot Dot Reticle and Mil-Dot Reticle riflescopes all provide the user with phase corrected, fully multi-coated optics ensuring a crisp, clear picture, no matter the reticle style.

TRIPLE DUTY

Inspired by military and law enforcement technology, Sightmark products are designed for hunting, shooting and tactical uses. This Triple Duty concept ensures that every Sightmark product can be used for everything from hunting applications to home defense and competition shooting applications. Sightmark believes that quality outdoor equipment should excel in these environments and because of their multi-application use, Triple Duty products stand above all others.

FLASHLIGHTS

NEVER QUIT

Upgrade your arsenal with the new Sightmark line of Triple Duty Tactical flashlights! Lit with a Cree LED, for maximum brightness, these flashlights are waterproof and constructed with aircraft grade aluminum for durability and recoil resistance. The SS280 features 3 mode functions: high power, half power and strobe function. The H840 features three 280 lumen Cree LED's, a push button tail cap, weapons mount, and pressure pad while the RC280 features a rechargeable battery and an AC adaptor.

The Sightmark Triple Duty Tactical flashlight line features top-of-the-line performance from highly versatile units making them perfect for hunters, tactical users and the serious nighttime shooter.

BORESIGHTS

NUMBER ONE MARKET SHARE

IN-CHAMBER BORESIGHTS

The Sightmark Laser Boresight provides the most accurate method for sighting in rifles, pistols and shotguns. Simply chamber the boresight like a regular bullet and a laser dot will show exactly where the rifle is aiming. It's easy to sight in any scope without firing a single shot. Perfect for hunters, competitive shooters and law enforcement. It's easy to use and will quickly save both time and money by avoiding prolonged live fire tests at the range. Use the extra ammo for honing those shooting skills and for the hunt. The Sightmark Laser Boresight is available in several calibers and gauges for use with all the most popular rifles, shotguns and pistols.

Easy to use

UNIVERSAL BORESIGHTS

The Sightmark Universal Laser Boresight provides the easiest and most accurate method for sighting in multiple rifles, pistols and shotguns of all types. Simply place the base of the boresight onto the end of the barrel of your weapon and it will attach magnetically. A laser dot will show exactly where your gun is aiming, so it's easy to sight in any scope without firing a single shot. The patent pending retracting arbor makes the Triple Duty version the most accurate and easy to use universal boresight on the market.

REFLEX SIGHTS/ MAGNIFIERS

THE PERFECT SHOT

Sightmark's ever-evolving improvement strategy has led to the creation of a sophisticated line of reflex sights, complete with the most requested features and modifications most desired by shooters. With dealer and consumer feedback as the basis for further improvements, the Sightmark reflex sights were created to satisfy the demand for a lightweight, accurate sight. Perfect for close range, fast moving targets, the Sightmark reflex sights were created with the discerning shooter in mind who needs to focus on his or her prey and illuminate the target for the most accurate shot. All units come with a matte black finish that eliminates reflection for a military, tactical look.

Sightmark magnifiers give the shooter long range capabilities when used in combination with a reflex sight. Featuring a slide to side mount, these units allow user to quickly move the magnifier out of the way without having to detach the unit. Featuring extended eye relief for comfort, a wide field of view for superior target acquisition and high quality multi-coated optics for improved visibility and clarity, these units are ideal for medium range distances.

Variety of reticles included in the dual shots, ultra shots and sure shots

LASER SIGHTS

PRECISION

The Sightmark series of Triple Duty tactical laser sights are multifunctional weapon sights inspired by military and law enforcement applications. They feature intense, accurate laser beams, which make them perfect for rapid fire or moving target shooting. Equipped with non-deviating windage and elevation adjustments, these laser sights ensure a hold at zero even through rough handling and heavy recoil. Perfect for fast moving, close combat situations, home defense or varmint shooting, these lasers are versatile products that will ensure accuracy.

BINOCULARS AND SPOTTING SCOPES

UP CLOSE AND PERSONAL

For anyone who depends on the highest quality optics designed for extra long distance, Sightmark's spotting scopes are the ideal accessory. The spotting scopes feature a built-in sunshade, lens filters and fully multi-coated optics to reduce glare and light distortions. With the Sightmark spotting scopes, hunters can spot their prey easily with precision accuracy and are vital for use in stake outs, police surveillance or for sniper spotters.

The Solitude series of binoculars feature a texturized, rubber armored body for a firm grip, ensuring the unit never slips out of the users hands. All Sightmark Solitude binoculars feature multi-coated optics and twist up eye cups. The Solitude XD binoculars use low dispersion glass, providing enhanced light transmission for true color fidelity. Coupled with lightweight magnesium housing and a sturdy rubber, armored body, the Solitude XD binoculars are built for the outdoors.
